

Develop Your Leadership and Management Skills

MSc in Engineering Leadership and Management

A flexible masters degree with no tuition fees through the apprenticeship levy

Offered at NSIRC in Cambridge and awarded by Aston University, this part-time MSc can be funded from your employer's apprenticeship levy so there are no tuition fees to pay.

The course has been designed to help you further your career by emphasising the 'how' of leadership and promoting experiential learning. Your employer will also benefit from being able to shape the course content to meet their needs.

Additional benefits of this MSc include:

- Hands-on, project oriented learning that directly relates to business
- The course attracts employees from a wide range of professional backgrounds which enables peer-to-peer knowledge transfer
- The teaching is delivered by lecturers with strong industrial and academic credibility
- There are no exams - you will be assessed through assignments that relate to your work

Who is this MSc for?

- Team leaders and supervisors
- Project managers
- Business support staff including HR, accounting, quality, safety, procurement, marketing, IT
- Engineers e.g. general, electrical, mechanical, civil, chemical
- Technologists and researchers

Why choose NSIRC and Aston University?

The National Structural Integrity Research Centre (NSIRC) has a proven track record of equipping postgraduates with the skills needed by industry, with over 200 MSc and PhD students choosing us in the last five years.

Aston University has a long history of forging partnerships with business and industry. We deliver practical degree apprenticeships developed with industry and approved by professional bodies. We will teach you the practical skills and management theory you need to progress in your career.
